AREEN MOHAMMAD ALMAHAMEED

AI GRADUATE | AI / MACHINE LEARNING | GENERATIVE AI

Amman, Jordan | +962 779361961 | areenalmahameed3@gmail.com | linkedin.com/in/areen-al-mahameed-57b7a2318 | github.com/Areenalmahameed

PROFESSIONAL SUMMARY

Recent Artificial Intelligence graduate with hands-on experience developing practical AI solutions using Python, Machine Learning, Generative AI, LLM applications, AI APIs, Computer Vision, NLP, and automation. Experienced in data preparation, feature engineering, model evaluation, AI-powered application development, and workflow automation. Built projects integrating LLMs, APIs, n8n, React, TypeScript, Flask, and data analytics. Interested in applying AI to practical business and operational use cases and developing reliable AI-powered solutions.

EDUCATION

Bachelor of Artificial Intelligence — Zarqa University | 2026 | GPA: 77.1/100

Relevant Coursework: Artificial Intelligence, Machine Learning, Deep Learning, Computer Vision, Data Science, Data Analysis, Database Systems, Software Engineering, Python Programming

TECHNICAL SKILLS

Programming & Data	Python, SQL, Pandas, NumPy, Matplotlib, Jupyter, Excel
AI / Machine Learning	Machine Learning, Scikit-learn, Classification, Clustering, Feature Engineering, Model Evaluation
Generative AI	LLM Applications, Prompt Engineering, AI Agents, Gemini AI, AI APIs, Document Processing
Computer Vision & NLP	OpenCV, Computer Vision, NLP, Speech Recognition
Automation & Integration	n8n, Workflow Automation, APIs, Conversational Workflows
Development	React, TypeScript, Flask, Git, GitHub, SQLite
Analytics	Data Cleaning, EDA, Data Visualization, Power BI, DAX

SELECTED AI PROJECTS

AI Resume Analyzer

- Built an AI-powered application that analyzes resumes against job descriptions and generates AI-based insights for ATS-oriented matching.
- Developed automated PDF/document processing workflows using LLMs, AI APIs, n8n, React, and TypeScript.

College Robotics Guide | Graduation Project

- Developed an AI-powered robotic assistant using Python, Flask, OpenCV, speech recognition, Raspberry Pi, Arduino, LiDAR, and ultrasonic sensors.
- Integrated computer vision and machine learning capabilities into a practical robotics application for intelligent interaction and environment understanding.

Customer Classification & Segmentation

- Performed data cleaning, exploratory data analysis, feature engineering, and model evaluation using Python and Scikit-learn.
- Built machine learning classification solutions for customer behavioral segmentation.

Telegram AI Auto-Reply Bot

- Built an automated conversational AI workflow using n8n, AI Agent, Gemini, Telegram API, and conversational memory.
- Integrated AI services and APIs to automate user responses.

Sales Dashboard | Power BI

- Built an interactive dashboard using Excel and DAX to analyze sales performance, KPIs, revenue, and profitability.

CERTIFICATIONS & TRAINING

Cisco Networking Academy — Data Science Essentials with Python | SHAI — Artificial Intelligence Training (90 Hours) | HTUx — Data Analytics & Business Intelligence | HTUx — Data Science | HTUx — Business Analysis | Robotna — Soft Skills Training (15 Hours)

LANGUAGES

Arabic — Native | English — Intermediate
